SAFETY
UNDER THE SUN
THIS SEASON

VISION Safe
Our Vision is Safety

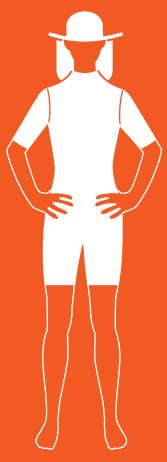
At VISIONSafe, we have developed an extensive line of sun protective products with a **UPF 50+ Excellent Protection** rating. Our range is carefully designed to meet **Australian Standards** to protect you from the extreme Australian sun.

Whether you work in the sun or enjoy outdoor leisure activities, we have the range and expertise to suit any budget.

WHAT DOES UPF 50+ EXCELLENT PROTECTION *MEAN?*

UPF 50+ EXCELLENT PROTECTION

There is scientific evidence that indicates the risk of skin cancer can be reduced significantly by routinely covering a greater portion of the body with appropriate clothing. The minimum recommended level of clothing for adequate protection provides coverage from the shoulder to mid thigh, and includes the crown, neck and torso. Broad brimmed hats, hats with wide brims and legionnaire style hats are effective methods of sun protection for the head, ears, face and neck.



Clothing or fabrics claiming an Ultraviolet Protection Factor of 50 or above mean that only 1/50th - or 2% - of the sun's Ultraviolet radiation will reach the skin through the material. Covering up with clothing, headwear and accessories with a UPF 50+ rating is the simplest way to stay safe in the Australian sun.

BELOW UPF 15	UPF 15	UPF 30	UPF 50 - 50+
Up to 20% UV radiation passes through fabric	Minimum protection	Good protection	*Excellent protection*
